Interesting and Intuitive class.

Instructor answered all questions he could  
and was very knowledgeable of the curriculum

The power point presentation was pretty  
rough. I will recommend this class to  
others

I enjoyed the class. Only complaint is I  
wish the training facility was larger.  
This way we can get more practical  
question and answer around  
real life ideas. I think the  
videos and presentation brought realism  
to the class. I think the Instructor  
was great and engaging and knowledgeable  
about the subject.

The training for this class was great.  
Very informative as to the laws and  
situations we could find ourselves in and  
appropriate responses. How to use the firearm  
safely and with as much precision as we  
could. Its obvious our instructor has  
years of experience to draw from. I loved  
This class!
